

FUNDING SITUATION FUNDED: \$8.42 MILLION REQUIREMENT: \$40.7 MILLION

Situation

- Aruba observed constant increases in COVID-19 cases, emanating mainly from unvaccinated persons. Consequently, the Government reverted to previous COVID-19 prevention protocols resulting in a ban on social gatherings, mandatory mask wearing, and curfews being reinstated, while commerce was limited to a capacity of 50%. The screening process for the food project targeting vulnerable locals and refugees and migrants (R&Ms), taken over by the government of Aruba (GoA) from the Red Cross, became more stringent and beneficiaries complained food hampers had insufficient items; while Fundacion Pa Nos Comunidad Aruba foodbank (FPNC) representative emphasized that the assistance was supplementary and emergency supplies only. The country embarked on a campaign to recognize the credentials of medical professionals within the R&M population and to work formally. Additionally, a parliamentary debate resulted in a request that the President provide the disaggregated number of undocumented persons in Aruba. Further, one R4V partner publicly denounced the repatriation program and related humanitarian flights that the GoA organizes almost monthly, due to the dire conditions that those returning to Venezuela might face and considering proper screening is not conducted to ascertain the status of those returning.
- Curaçao also reinstated pandemic restrictions as active COVID-19 cases increased. A curfew was restored on 13 August from 12.00 p.m. to 4:30 a.m. The food aid project funded by the Dutch government was ongoing, with the end-date of 15 September approaching, provoking uncertainties about its continuity as an agreement has not yet been reached with the *GoC* to handover responsibility after its end.
- The state of emergency and curfews in the Dominican Republic (DR) were relaxed and will be lifted in provinces with 70% of the population vaccinated. On 9 August, La Altagracia and the National District provinces became the first regions to be without a curfew since March 2020. Additionally, Venezuelan Normalization Plan applicants with visas have been returning to Venezuela to bring other family members. The Plan is on the second stage of visa issuance and a second registration will open in early September for Venezuelans who were unable to apply previously.
- Curfews remained as the Centre for Disease Control and Prevention (CDC) categorized Guyana as level 3 (high) for COVID-19, prompting the health minister to urge all persons in the country to be inoculated. Authorities mandated all healthcare workers and public transport operators be vaccinated to prevent further exposure to the virus, announcing <u>a two-week extension for their vaccination</u>. Non-compliance will result in submission to regular PCR tests and the suspension of licenses for transport drivers. On 24 August, <u>Guyana received its first shipment of Pfizer vaccines; a donation from the USA</u> which will be administered to people between the ages of 12 and 17, including R&Ms within this age bracket in schools, with parents' consent. Additionally, 92 of some 938 public schools across the country, were scheduled to <u>reopen</u> for full face-to-face learning, while the remaining 846 were slated to reopen on a rotational basis. Also, Venezuelan women and adolescent girls reported to partners having limited financial resources to access menstrual hygiene products in the host country.
- Trinidad and Tobago (T&T) confirmed its first two cases of the COVID-19 Delta Variant on 11 August. The health minister encouraged the public to get vaccinated as uptake for the COVID-19 vaccine slowed considerably. T&T received 305,370 doses of the Pfizer vaccine donated by the USA, intended for people between the ages of 12 18. All R&Ms inside this age group became eligible for the vaccine with some receiving the first dose. The MoH also approved the Pfizer vaccine for use by pregnant women. A State of Emergency (SOE) with a daily 9pm to 5am curfew was extended for a further three months, with phased reopenings of the retail sector on 16 August. As preparations were underway, local media reported that 6,000 of the 17,000 small and medium enterprises would not re-open, bearing negative socio-economic implications for many Venezuelans and locals that were previously employed in this sector. Furthermore, the Immigration Division commenced six-month extensions on expired work and stay permits for Venezuelans with the new expiry date set for mid-November. The authorities will re-evaluate Venezuelans' registrations at the end of 2021. 12 children were among 39 Venezuelans detained for irregular entry into T&T during the reporting period. Furthermore, the T&T Coast Guard intercepted a pirogue carrying several Venezuelan nationals, and reportedly piloted by a Trinidadian crew. The vessel and its occupants were escorted to the Coast Guard base to await processing.

August 2021

Response

In Guyana, one R4V partner facilitated individual and group mental and psychosocial health support sessions for Venezuelans, including GBV survivors. In Curaçao, an R4V partner provided psychosocial assistance to Venezuelan R&Ms for depression and family trauma. In Trinidad and Tobago, paediatric services reached R&M children through a mix of telehealth and in-person consultations while mental health and psychosocial support (MHPSS) was provided remotely. Additionally, Spanishspeaking R&Ms accessed free sexual and reproductive health (SRH) services through telehealth, and in-person consultations were conducted through clinic visits.

In Aruba, an R4V partner assisted R&M children with school enrolment through its Back-to-School Campaign. New tablets and projectors were supplied by a partner to an educational institution that caters to R&M children in Curaçao, while in T&T, partners helped refugees and migrants with tailormade learning via the Equal Place program, which works on two globally recognized platforms offered in English and Spanish. 14

students in T&T were among the first cohort of DAWERE graduates after successfully

completing all coursework and assessments. Graduating students received the

Venezuela-based high school diploma that certifies completion of secondary studies.

In an effort to promote wellbeing and prevent COVID-19, a Guyana R4V partner delivered hygiene kits to Venezuelan women and adolescents' survivors of GBV, and to at-risk individuals with specific needs in Regions 4 and 7. The kits were delivered during a menstrual hygiene talk, where contents of the kits were explained. In Aruba, another R4V partner distributed 30 care kits to Venezuelan sex workers while a Curaçao R4V partner provided hygiene kits to R&Ms at high risk of experiencing GBV, particularly, Venezuelan R&M sex workers.

INTEGRATION

One R4V partner in Guyana provided individual and group information sessions to R&Ms on how to access language services in the host country, to combat language barriers and to access basic services such as health, education, documentation, and social protection. An Aruban partner conducted art therapy workshops for Venezuelan R&M adolescents between the ages of 12 and 16, to provide them with tools to manage stress and emotions in their daily lives. T&T partners also supported vaccination drives assisting R&Ms in receiving their COVID-19 vaccines. Volunteers, including translators in multiple languages, were on hand each day to ensure a seamless process.

Supplies provided through Entrepreneurial course in Guyana, 2021 ©UNFPA

Capacity building training was provided by R4V partners to law enforcement and judicial officers on international refugee protection in an effort to reduce detention and increase freedom of movement. Protection hotlines in Aruba and Curaçao continue to be available to help R&Ms face pandemic challenges, and both countries saw distributions of cash and voucher assistance for vulnerable R&Ms and increased identification of persons requiring assistance. Also, Aruba and DR partners provided legal assistance to GBV survivors and R&Ms facing detention. Legal assistance was delivered in the DR on topics of labour rights, protection, and more.
