These figures represent the sum of Venezuelan refugees, migrants and asylum-seekers shared by host governments. They do not necessarily imply individual identification, nor registration of each individual, and may include a degree of estimation, as per each government's statistical data processing methodology, at times in collaboration with national R4V Platforms.

*This includes other countries outside the 17 Latin American and the Caribbean R4V countries. For more information on the countries included, refer to the table in the last page.

The boundaries and names shown and the designations used in this map do not imply official endorsement or acceptance by the United Nations.

CONTEXT:

The statistics displayed above on refugees and migrants from Venezuela in the 17 countries of the R4V Response reflect official figures issued by the respective host governments. Their use and publishing for R4V products is closely coordinated with relevant government statistical offices and/or other national government departments responsible for management of refugee and migrant statistics. These

statistics are periodically updated, with some governments updating them on a monthly basis, while others update them in other undefined intervals. As a result, an increase in shared figures from one month's R4V publication to the next in any particular country could appear as a significant increase in arrivals of refugees and migrants from Venezuela, while, in fact, it is mostly related to individual host country reporting and publishing procedures.
