\*Unless otherwise indicated, the regional figures on this and the following sector pages, include the various population groups subject to the RMRP response (incl. refugees and migrants from Venezuela in-destination, in-transit and pendulars, as well as Colombian returnees, affected host community members, and other nationalities of refugees and migrants in-transit). Notably, transit figures are included in all Platforms except the Caribbean. In the case of refugees and migrants from Venezuela in-transit, as they transit through different countries before reaching an in-destination country, and to avoid double counting, they are not summed in the overall regional calculations. In contrast, in the case of other refugees and migrants in-transit (apart from Venezuelan nationals), and in order to avoid double-counting, only the maximum value in the region is included in the regional and subregional totals.
