

# HUMAN TRAFFICKING & SMUGGLING

## OVERALL REGIONAL FIGURES

© IOM/ Gema Cortes

There is a significant increase in the population in need of protection from or responses to human trafficking and smuggling, which is 47 per cent greater than the original 2024 response plan (and 25 per cent greater than 2023). There is also an increase in the target population to be reached by activities of Sub-sector partners in 2024, up to 37,500 people, compared with 32,700 originally planned for 2024. Despite these increases in the PiN and target populations, the budget for the Sub-sector has increased only slightly (to 20 million) from the original plan for 2024 (19 million) while 68 per cent of the activities originally submitted for the 2024 response remain unchanged. The biggest changes for the Sub-sector are in the response in Colombia (where the budget decreased by 25 per cent, and where 30 per cent of activities were eliminated from the initial 2024 plan) and in Peru (where the budget increased by 13 per cent, and where 89 per cent of activities remain unchanged).
